

EDZLEIZEL MAE G. SAGABAEN

Science City of Muñoz, Nueva Ecija | Email: edsagabaen@gmail.com | Contact No.: (+63)906 741 2559

Technical Skills

Programming Languages & Databases:

C++, Java, PHP, Python, JavaScript, TypeScript, HTML/CSS, Dart, MySQL, PostgreSQL, SQLite

Frameworks, Libraries & Tools:

Laravel, Django, Node.js, Native PHP, React.js, Tailwind CSS, Bootstrap, Angular, Flutter, Visual Studio Code, Git, Figma, Canva, Jira, Docker, XAMPP, Herd

Education

Central Luzon State University

Science City of Muñoz, NE

Bachelor of Science in Information Technology (BSIT)

2022 – 2026

- Awards: Cum Laude GPA (1.49), University Scholar (2023 – 2026), College Scholar (2022 – 2023)

Work/Leadership Experience

Knowles Training Institute

60 Paya Lebar Rd, #07-54 Paya Lebar Square, Singapore 409051

Software Engineer Intern

January 5, 2026 – April 10, 2026

Remote On-the-Job Training (OJT)

- Built responsive teacher and student dashboards, a 5-box Leitner Spaced Repetition System (SRS), and a 3×3 question matrix (three difficulty levels × three question formats) using React and Tailwind CSS
- Implemented a teacher staging area for AI-generated question verification with edit, approve, regenerate, and delete functions
- Integrated JSON Web Token (JWT) authentication and role-based access control to separate teacher and student permissions
- Applied WCAG 2.2 accessibility standards to ensure inclusive design and collaborated remotely using Jira for task tracking, Git for version control, and agile sprints

Certifications

- AWS Cloud Foundations, October 2025
- Managing Cybersecurity Incidents and Disasters – Kennesaw State University, December 2024
- TOPCIT (Test of Practical Competency in ICT) Level 2, November 20, 2024

Projects

EDTRUST AI: AI-Native Educational Platform

- Built responsive teacher and student dashboards using React and Tailwind CSS, featuring a 5-box Leitner Spaced Repetition System, a 3×3 question matrix (three difficulty levels × three question formats), a teacher verification staging area, and analytics tracking dashboards.
- Implemented JSON Web Token (JWT) authentication for role-based access control, a quiz session user interface, and mastery and regression dashboard components for tracking student progress.

RESQNECT: Enhancing Bayani App for GIS-Enabled and Data-Driven Emergency Response in Science City of Muñoz | scm-resqnect.online

- Developed a cross-platform emergency response system (web app + mobile-responsive design) featuring image anonymization, automated nearest-responder dispatch, and real-time location-based alerts for flood, fire, earthquake, and medical emergencies.
- Created GIS-powered data visualization dashboards accessible on both web and mobile devices, enabling real-time incident tracking and improving city-wide emergency response coordination and user privacy protection.
